PEARL Tom/Cymbal Stand

From Pearl's premium, tour-grade hardware range, the TC-1035B modular Tom and Cymbal Stand features a separate Gyro-Lock 7/8" Pipe Tomholder and a CH-1030B Gyro-Lock boom cymbal holder. Each features ratchetless, multi-axis tilt adjustment, and are attached to the stand with a two-hole clamp, allowing independent height and angle positioning. With form-fitting stop locks and practically infinite angle adjustability, the main section's Trident Tripod features insulated pipe joints for rock-solid height settings and silent stability.
