SABIAN 22" Todd Sucherman Session Ride

The 22" HH Sessions Ride is a collaboration between the Master Artisans at SABIAN and Todd Sucherman, a true Master of the craft of drumming. Handcrafted in the SABIAN factory, this very special Ride cymbal has been designed to be Todd's Ride of choice for Studio recording, the Sessions Ride is heavily hand hammered and then hand lathed to create multiple thicknesses over its surface – and then hand hammered for a second time. The result is bold articulation, a pleasant splash on the slap, a complex spread and a massive crash. The pitch of the bell is designed to be higher than the tonic note of the cymbal, which gives the Sessions Ride its special quality as both a studio weapon and a monster on the stage.
