SABIAN 22" HHX TEMPEST

The 22" HHX Tempest is a multi-application cymbal with an incredible dynamic range. It has a unique look, feel and sound, with its medium thin weight and aggressive HHX hammering creating an instrument with a beautifully controlled swell when played either with stick, or mallets, making it ideal for both drum set and orchestral applications. The HHX Tempest offers tremendous light ride capabilities, delivering a warm dark undertone to the wash.
