SABIAN 12" AAX Aero Splash

All about high-end cut, 12" AAX Aero Splashes decay more naturally than SABIAN O-Zone splashes, but their multiple small-hole pattern design delivers a higher density of white noise concentration than the AAX Air Splash. If you're looking for the perfect blend of musical effect with white noise, the Aero Splash may just be the ideal choice! SABIAN is committed to creating the widest, most innovative range of sounds on the planet, giving drummers more choice in creating their sound.
