SABIAN 18" HHX Thin Crash

The 18" HHX Thin Crash introduces a whole new design to the HHX line. Starting with a round of sparse hammering, followed by lathing, then denser HHX hammering over top, the result is a crash cymbal that is thinner, darker and faster than the HHX Studio Crashes it replaces. A smaller bell also ensures a faster attack and a crash cymbal that trends lighter in weight than most thin crashes. The versatility to easily cross musical styles has always been a hallmark of the HHX line, and the HHX 18" Thin Crash is no exception. If you're seeking a small, thin Crash with shimmering dark tone – this is it!
