SABIAN 18" HHX ANTHOLOGY HIGH BELL

HHX Anthology is a pinnacle of essential HHX technologies, uniting traditional and contemporary sounds. The cymbals embody Jojo Mayer's philosophy that it is the player who decides what the cymbals are – crash or ride – they transcend labels. The 18" HHX Anthology High Bell innovative design allows the full spectrum of both Ride and Crash sounds to unfold in each cymbal with no compromise to sound or feel. The unprecedented sonic control and range puts creativity into the drummer's hands and opens new possibilities to play their way.
