JOYO PC-B PEDAL CARPET

Not only is the Pedal Carpet incredibly light, but it has a few clever features…

- The power cords of the pedals can be concealed in the inner layer, the soft material enables you to cut a hole anywhere. This ensures that the connection layout is quite neat and there is no limit for how many holes you can make.
- As the pedal board is soft and foldable, changing patch cables is easy, just lift the board gently and it will fold, exposing the jacks of the pedals. This means you can change cables easily without removing the pedals from the velcro.
- It uses a single row design which can easily be folded and stored in its bag.
- Size: 655x(150+150)mm
- Weight: 454g
- Thickness: 4mm
- Material: Velcro, eco-friendly PVC, withseamless connection
