EPIFANI PERFORMER PS1000 HEAD

EPIFANI PERFORMER PS1000 HEAD

The big brother to the PS 400 it too was engineered to maintain the integrity of the input signal and to exhibit noise floor levels acceptable only in professional recording environments. The class D amplifier represents the next generation of digital amplifier technology and, coupled with the audiophile class pre-amp, the PS 1000 sets new standards in high powered, affordable instrument amplification. While the front panel suggests a basic three band EQ, the addition of the mid cut switch and the mid cut level control add an additional stage of tone shaping capability. Via the Epifani footswitch the mid cut and mute can be engaged or disengaged.

1000 watts @ 4 Ohms, Passive/Active input select, 3 band shelving EQ, Treble Shift, Mid Cut Selector (footswitch accessible), Mid Cut Level Adjust, Mute (footswitch accessible), DI out w/level, Pre/Post EQ select, ground lift, Tuner out, Pre-amp out, EFX sends and returns (series or parallel), Speakon output connector.
