FENDER BASSMAN 400 COMBO

FENDER BASSMAN 400 COMBO

The Bassman was designed to perform. This 400 features 350 watts of power with enough tonal versatility to keep you busy for years. The main section consists of Gain, Room Balance, Bass, Treble with Enhance switch and Compressor. This offers you a pallete of tones all on its own- from warm, silky jazz to vibrant slap/pop to pushed overdriven tones, it's in here. Next up is the 3 band eq section. This is incredible- Low, Mid, & High- each with its own frequency selector and Level control.
 At the end of this you have an EQ section Gain control. The eq section is switchable via the front panel- allowing you to use this amp as a 'dual channel'. Set your rhythm sound then use the eq to switch in a lead tone. Very versatile. All of this great tone runs at 350W to the dual 10" speakers and adjustable horn. On the back you'll find an effects loop, balanced line out, and tuner out. The perfect amp to take you from the practice room to the stage. This Bassman is in good overall condition. This amp has been fully tested and works as it should. This is your chance to get your hands on one of Fender's finest bass amplifiers - the Bassman 400.
