BLACKSTAR ARTISAN 100 HEAD

The ARTISAN 100 takes the boutique 100W design to a whole new level of flexibility. The Voice control is a timeline which chronicles the evolution of the genre from the earliest American designs through to British designs of the '60s and '70s. This is achieved by switching the preamplifier voicing and power amplifier damping simultaneously.

- 100W head
- 4 x EL34 output valves
- 4-way Voice switch charts the timeline of 100W designs
- Hi and Lo inputs perfect for channel blending
- Impedance selector.
