HUGHES & KETTNER ZENTERA

It re-creates the sound of 11 vintage and modern amp classics and then tops them off with an arsenal of digital effects, including reverb, delay, and modulations"everything from vintage '70s stompboxes to high-end reverbs. Drives it all with 2x100W of RMS power to drive two Celestion 30s. 24-bit A/D conversion and 32-bit processing provide highest sound definition and quality. The voicing section provides bass, mid, treble, and presence knobs that respond exactly the same way as the knobs on the original of the selected model. Other features include 128 preset memory, recording outs that include stereo analog and digital (S/PDIF) with RED BOX cab simulation, serial stereo effects loop, MIDI in/out/thru, 2-way footswitch connection, standard CV pedal connection, and headphone out.

FEATURES:

- 2x100W stereo power
- 2 - 12" Celestion speakers
- 128 presets
- Digital reverb, delay, and modulation effects
