HUGHES & KETTNER SWITCHBLADE HEAD

The World’s first fully programmable Tube Amp with digital Multi-FX

For another first in guitar amp history, Hughes & Kettner has packed all the features guitarists have long been dreaming of into one amp: A genuine all-tube design and the boundless versatility of amp modeling. A bona fide tube amp. With tube-driven pre and power amps. And 4 channels that put the full arsenal of classic tones at your fingertips, from spine-tingling clean and crunch to singing lead and crushing ultra saturated sound. You don’t need external effects, because reverb, delay and the most popular modulation effects are already on board in top-drawer digital quality. Best of all, you can store all amp and effect settings in up to 128 presets and activate them live on stage at the touch of a button. And that means your sounds perfectly matched to your songs. No more panicky button-pushing between numbers. And today’s sweet-spot settings are saved many tomorrows to come.
Switchblade.
No compromises in features.
No compromises in handling ease.
And certainly no compromises in all-tube tone.
