KME VSS 15

VSS 15
completely digital system unit integrating a 15" subwoofer and three class D amplifiers (1 x 750 W + 2 x 500 W) with a digital signal processor 24 Bit / 48 kHz and a sensational lightweight of 26 kg. As a premier the analogue input signal is digitalized directly inside the input amplifier using an intelligent 24 bit AD converter and remains consequently digital to the Class D amplifiers´ output. The new technology avoids conversion losses, increases the utilizing dynamic range and achieves a much better sound quality due to a precise reproduction of the audio signal.
