JOYO CM-25 4 WAY DAISY CHAIN SPLITTER CORD FOR GUITAR EFFECT POWER SUPPLY

JOYO’s CM24-26 daisy chain cables can supply power to more than one effect pedal. All the DC plugs of these series have undergone pure copper electroplating treatment and the core of the power cable is a pure copper conductor. These cables are suitable for heavy current or low current effect pedals.

Specifications:
- Product name: 4 plug daisy chain cable(you can use more pedals with a single power supply, make sure your output can handle the combined mA of the pedals)
