PLANET WAVES PW-BG-20 BRAIDED INSTRUMENT CABLE 6M BLACK/GREY

Utilizing the latest in cable manufacturing technology, D’Addario’s Custom Series Braided Instrument Cables feature a coaxial oxygen-free copper conductor with two layers of impenetrable noise-rejecting shielding formulated for low capacitance. The lower cable capacitance allows your instrument’s brilliance, presence and character to be transmitted with the utmost transparency. Additionally, the nylon braiding protects the cable against abrasions, cuts and kinking. Nothing should come between your instrument and amplifier—that includes your cable. Available in Black, Grey, and Tweed designs in lengths of 10’, 15’, and 20’.

- Nickel Plated plugs for optimal signal transfer
- Lifetime Warranty
- Available in Black, Grey, and Tweed

D'Addario Custom Series cables utilize ultra-pure, oxygen-free copper conductors for low capacitance and pure tone. Two layers of shielding provide 100% coverage for superior insulation and noise rejection, making this the ultimate, high-performance cable.
