PEARL ERIC SINGER SIGNATURE SNARE

In tribute to 30 years of drumming together on stages all over the world, Pearl and KISS drummer Eric Singer recently collaborated to create a new Limited Edition Signature drum with a nod to one of the great snares of Pearl’s past.

“I collect classic and vintage Pearl drums,” says Eric. “I love the sound and feel of the original Jupiter Chrome-over-Brass models from the 70’s, and really wanted to explore that sound with an updated feel.” The result is Eric’s new 30th Anniversary Limited Edition Signature Snare

Released on the heels of Singer and Pearl’s successful charity drum auction for the Lifeline Charter School in 2016, Eric’s new snare begins with a dual-beaded Jupiter-style 1mm Chrome-plated Brass shell. In contrast to the Jupiter’s original parallel action strainer, Eric’s Limited Signature update features Pearl’s compact Click-Lock throw-off for smooth, sensitive response. Each drum assures tuning accuracy with Pearl’s low-contact CL Bridge Lugs and features a personally signed Attack ES Signature drumhead.
