JOYO JF37 ANALOG CHORUS PEDAL

JOYO JF-37 analog chorus has a very sweet chorus sound. A modulation effect chorus brings life to guitar chords. When used on lead guitar with a delay, the effect is surreal and beautiful. Analog Chorus can expand your musical horizon, when it comes to original tones.

The simple layout has the necessary controls, allowing you to dial in various sounds. Arpeggios and single note riffs sparkle with the rate set low or high and depth at the half-way point. Great for jazz, country or even rhythm and blues, the JF-37 Analog chorus pedal gives you that distinctive chorus sound from a stage-ready stomp box.

Here is a lovely demo from Roy Fulton, he is just so smooth. Give him a like and subscribe to his channel for more reviews, great playing and maybe a lesson or two!
