BLACKSTAR FS-11 FOOTSWITCH PEDAL

The FS-11 is a rugged two-way footswitch with a metal housing, for use with our new ID:Core series.

The footcontroller expands the functionality of our ID:Core amps:

The FS-11 offers two modes of operation.

Mode 1 – allows the user to switch between two channels and turn the effects on and off.

Mode 2 – allows the user to switch between all the patches (down on switch one and up on switch two).

Please note the FS-11 footcontroller can only be used with the ID:Core Stereo 20 and ID:Core Stereo 40.
