TC ELECTRONIC G-SYSTEM

G-System is the world’s first complete high quality floor based Guitar System. Delivering a complete and uncompromised package of effects, control and integration, no other product will match the flexibility or the quality of the G-System.

With its unique combination of two DSP sections providing the very highest quality effects on the market, analog loops, amp switching, floor control, and even 9VDC power outputs for your pedals, the G-System offers the highest level of integration attainable.

Choose between a rack or a floor based setup, decide how the effects are routed, tailor the foot switch layout, and choose from more than 25 different on-board effects.
