BEYERDYNAMIC TGI50D

Beyerdynamic TG I50d

Beyerdynamic TG I50d dynamic microphone is an ideal instrument mike with its cardioid pickup pattern. TGI50-d enhanced space behind the diapgragm for improved bass reproduction. Beyerdynamic TG I50d has the perfect balance between a rounded, powerful sound and an excellent suitability for the stage.

Whether with electric guitar or bass amplifiers, snare drums or brass instruments, this dynamic instrumental microphone demonstrates notable feedback reduction even on the loudest rock-and-roll stages. Extreme EQ settings at the mixing console are not necessary with the TG I50d: plug it in, activate the high-pass filter if needed and then smile.
