AUDIX D2 DYNAMIC INSTRUMENT MICROPHONE

Professional Dynamic Instrument Microphone

The D2 dynamic instrument microphone is used for stage, studio and broadcast applications. It is designed with a hypercardioid pickup pattern for isolation and feedback control and is equipped with a VLM™ diaphragm for natural, accurate sound reproduction.

The D2 is an excellent choice for miking instruments with a percussive nature such as rack toms, congas, saxophones, guitar cabinets and brass. Transformer less design, low impedance and balanced output insure that the D2 hypercardioid instrument microphone will perform interference-free.
