SABIAN AA REGULAR HH 14

Explosive. AA cymbals combine musicality and energy for sounds that are bright, bold and explosive. Reinforced with the power and strength of multi-rolled, secret-process bronze shaped under 75 tons of hydraulic pressure, AA delivers with inner strength and outer energy. Cool for retro, right for now, these highly durable cymbals move a lot of air in any kind of music. From the Latin flavor of El Sabor to models that rock, swing, and groove, AA is extremely versatile.
