SABIAN AAX MEDIUM CRASH BRILLIANT 18"

The 18" AAX Medium Crash from SABIAN introduces a whole new palette of sound to the AAX line. The larger raw bell adds more meat for more projection. A whole new style of hammering – much more visible on the surface of the cymbal due to the larger, rounder peen – makes for a more complex and slightly darker crash. At the same time, more highs are introduced into the sound, resulting in a wider band of frequency. For drummers, that means brighter highs and more complex lows. SABIAN has always pushed the boundaries of innovation, using the latest manufacturing technology to answer new trends in music and sound. AAX Medium Crashes are no exception, answering the call for brighter, faster, more complex crashes.
