DI MARZIO BLAZE DP700 7-STRING NECK PICKUP

DI MARZIO BLAZE DP700 7-STRING NECK PICKUP

This is the model originally designed for the neck position of the Ibanez® Universe. The neck position needed to be warm, but not too fat (nobody wants the low “B” sounding like a tuba, right?), so we scooped out some of the mids to brighten up the low notes and we kept the power down to a reasonable level to avoid unnecessary sludge. You can get everything from a good jazz sound with a clean amp to a wall-of-sound with heavy overdrive. Many players have discovered the Blaze™ Neck Model is also a very good bridge pickup when playing with a serious amount of distortion — power chords retain more openness, and single notes have a lot of clarity.

Caratteristiche:

Wiring: 4 Conductor

Magnet: Ceramic

Output mV: 280

DC Resistance: 15.8 Kohm
