GIBSON MINI HUMBUCKER RHYTHM - GOLD

### GIBSON MINI HUMBUCKER RHYTHM - GOLD

When Gibson introduced the Les Paul Deluxe in 1969, it incorporated the mini-humbucker which had only been available on certain Gibson-made Epiphone models. With its smaller size, narrow magnetic field and unique design combination, the mini-humbucker produces bright and focused output, while retaining the famous Gibson humbucker performance.

Gibson now offers a vintage replica of the original mini-humbucker, featuring adjustable pole pieces and bar Alnico II magnets. It's authentic in every detail, from its creme plastic mounting and special coated enamel wire, to its maple spacers and vintage braided lead wire.
