LINE6 XDV75 RADIOMIC. A MANO

LINE6 XD V75 - Radiomic. a Mano

- 300-foot range
- 14 always-available channels – use up to 14 systems simultaneously
- Line 6 microphone modeling (handheld systems) or EQ filter modeling (Lavalier, Headset, TR)
- Patented, 4th-generation digital wireless technology

Receiver Features

- Large back-lit LCD display for advanced configuration and monitoring
- Three 5-segment LEDs for monitoring RF strength, battery status and audio levels at all times
- Robust aluminum chassis
- Signal encryption
- Dynamic Filter to combat unwanted environment noise
- Gain control to optimize receiver output
- Channel Scanning for RF management in multi-system applications
- 2 powered BNC antenna outputs for daisy-chaining multiple systems
- 2 BNC antenna inputs for antenna connection
- Rackmount kit included

Handheld Transmitter Features

- Premium dynamic microphone capsule with cardioid polar pattern
- Robust metal body resistant to handling noise
- LCD display for selecting channels, battery status, microphone model and more
- Interchangeable microphone capsules – compatible with other industry standard mic capsules
- Lock mode to prevent changes during performance
- Power and Mute for control over output
- Low Power Mode for extending battery life
- Transmitter Naming for identifying transmitters in a multi-system application
