MOOG MATRIARCH 4-PART PARAPHONIC SEMI-MODULAR SYNTHESIZER WITH PATCH OPTION

Moog Matriarch is a patchable 4-note paraphonic analog synthesizer with a built-in Sequencer, Arpeggiator, stereo Ladder Filters, and stereo Analog Delay. Create rich evolving chord patterns immediately with “no patching required”, then tap into an abundance of inspiring textures, new sounds, and an endless supply of happy accidents through Matriarch’s 90 modular patch points. Based on the vintage circuitry of classic Moog synthesizer modules, Matriarch is a catalyst for creative ideas and a medium for multidimensional expression.49-Key keyboard with aftertouch via MIDI, KBD VEL OUT
