UNIVERSAL AUDIO UAD1 - PROJECT PACK

The Universal Audio UAD-1 Project Pak brings UA's revolutionary combination of DSP hardware and highly-prized software plug-ins within the reach of small PC or Mac project studios with a limited budget. Existing users can inexpensively take advantage of even greater power, by using multiple UAD-1 cards (up to 4 per system). The UAD-1 Project Pak supports 44.1 to 192kHz sessions and is the easiest way to upgrade your mixes and get that professional polished sound using your existing DAW software/hardware without needing a computer upgrade.

Includes the UAD-1 fully PCI 2.1 compliant short card that supports 66MHz and faster bus timing. 7" form factor. It offers more DSP headroom per plug-in than other multichip DSP cards, and supports sampling rates from 32kHz - 192kHz.

Includes the following plug-ins:

CS-1 Channel Strip
DM-1/Delay Modulator
RS-1 Reflection Engine
EX-1 EQ & Compressor
Nigel
Realverb Pro
Pultec EQP-1A
1176 SE Limiting Amplifier
Preflex Amp/Cab Simulator
Gate/Comp
Phasor
Mod Filter
Trem/Fade
Mod Delay
Echo
