KONIG & MEYER 21020 MICROPHONE STAND -
CHROME

One of the most widely used microphone stands, which makes it the industry standard for microphone tripods. Built in 1967 the 210/2 has stayed almost unchanged and up to the date been sold more than 2 million times.

Very sturdy mechanical parts, such as the the die-cast base, which guarantees a long life even when often being transported. Variable boom arm and large height adjustment makes it also suitable for singing instrumentalists.
