KONIG & MEYER 44210 PRODUCT HOLDER FOR VIOLIN BLACK

The new König and Meyer violin holder allows the safe and practical presentation of the instrument on a display unit. The violin is not held by its neck but by the curved end of the peg box. The depth of the holder means it is virtually impossible to remove the instrument inadvertently nor can it fall from the holder. The bow holder integrated at the side allows the violin and bow to be picked up comfortably and easily. The durable flocked covering is protection for the violin and perfectly complements this quality product.
