AKG D12-VR Microfono dinamico cardioide per G.Cassa

"KICK THE HAMMER"

Kick the hammer

for bass drum live and recording applications

The D12 VR is a reference large-diaphragm dynamic microphone with cardioid polar pattern. Designed specifically for kick-drum recording applications, the microphone has a thin diaphragm to enhance the low frequency performance. Its warm sound is realized by the original C414 transformer, especially impressive at high signal levels.

The D12 VR features three active filter presets to match its sound shape with the kick drum's character. When activated, the output level is automatically reduced by 10 dB. The filter settings can be controlled using a switch on the microphone body. Without phantom power, the microphone operates in passive mode and delivers the instruments pure sound.

Specifiche tecniche :

Reference large-diaphragm dynamic microphone

Polar Pattern cardioid

Audio Frequency bandwidth 17 to 17000 Hz

Sensitivity 1.2 mV/Pa

Max SPL 164 db SPL

Electrical Impedance 200 Ohms

Recommended Load Impedance 1000 Ohms

Audio Output Type Balanced XLR

Gender Male

Contacts 3-pin

Design

Body metal

Finish galvanized nickel matte/black

Net Weight 500 g

Length 101 mm

Width 66 mm

Height 125 mm
Diameter 66 mm
