AVANTONE CDMK-7 DRUMKIT 7 PZ

Avantone CDMK-7 7-Mic Drum Mics Kit with Case

These are the 2nd generation of drum mics from Avantone and a great deal of R&D effort has culminated in these rugged, great sounding drum mics. We feel they represent the very finest drum microphone packages available, both for live clubs & concerts, as well as serious studio recording projects. The Avantone CDMK drum mics are truly gorgeous looking and sounding microphones. Their proprietary design, character and performance are made to set a new standard in drum mic'ing.

A unique feature of all our dynamic drum mics in the Avantone CDMK series is a pair of machined insets on the barrel of each microphone body. These insets allow the O-rings of the SSM shockmount to "lock" the mic into place, which prevents mic shifting and slippage. Aesthetically, each mic features an elegant Cabernet Wine-Red finish, accented with polished nickel trim. Any studio or venue can proudly & confidently offer the CDMK drum mic kit for professional use.

All components are designed and manufactured using the finest materials yielding a very solid feel, superb structural integrity and rugged reliability.
