CASCHA HH2088 MICROPHONE CABLE XLR MALE / XLR FEMALE 6M

High durability
The CASCHA XLR cable is very light and, thanks to its special design, can easily meet the demands of daily use. The outer Super-Flex-PVC sleeve is particularly strong and protects the cable from damage.

High quality workmanship
The cables are individually shielded and surrounded by a special indicator cotton cover. Together with the spiral shielding, they ensure a stable transmission rate and best sound quality. Noise and crackling are a thing of the past!

Fitting lengths for every application
CASCHA microphone cables are available in 1m, 3m and 6m versions. For home, studio or stage: CASCHA has the right cable for every application.
