DAP AUDIO FP08 SCHUKO/XLR F - IEC/XLR M 20M

Now finally available as prefabricated cable: power and signal incorporated in one single cable! No more cable-"mess", just one cable to your active speaker, mixing console etc. Currently there are three different models available, all designed for use with audio equipment. All 3 models have XLR-M to XLR-F signal connector and different types of current-connectors. Please note that with a little work these cables can also be used with light equipment! nevertheless you can expect to see more audio and light solutions coming up.
