SCHOEPS B5

Acoustic foam close-speech popscreen' provides sufficient protection at normal speaking distances for cardioids and other directional capsules, especially when speech capsules are used. With omnidirectional capsules it may even be used outdoors in light wind. Minimal effect on sound quality.- for moderate distances from the person speaking- can also be used as a windscreen for pressure transducers- negligible effect on sound qualityB 5Attenuation of wind-noise at 18 km/h (11 mph) for an omni 28 dB-AAttenuation of wind-noise at 18 km/h (11 mph) for a supercardioid 20 dB-ALength 70 mmDiameter 45 mm
