TELEFUNKEN M81WH WIRELESS CAPSULE

The M81-WH is the wireless capsule head variant of the M81 Universal Dynamic. The wireless capsule is sonically identical to the M81 Standard and M81-SH and has the same condenser like performance, minimal proximity effect, and superior feedback rejection one expects in TELEFUNKEN Dynamic Series microphones. The M81 Universal Dynamic retains articulate mid-range as the M80 Dynamic, however, the top end is pulled back a bit yielding a flatter overall frequency response.

The product features the same exact dynamic capsule, head grille, and output transformer all neatly packed within a capsule body that is ready to be mated to your wireless transmitter system of choice.

Compatible with the following transmitters:

Shure:

- Axient
- UHF-R
- QLXD
- ULXD
- ULX
- PG
- PGX
