Word CLock Distribution Amplifier e Audio Clock
Converter - Word Clock + AES3/11 + S/PDIF,
16-24Bit/32-192kHz

Distributes and converts Word Clock, AES3/11 and S/PDIF Extracts and re-generates clock signals out of digital audio signals Improves audio quality of connected devices Handles clock rates from 32.0 kHz up to 192.0 kHz/768.0 kHz supports so-called Super Clocks for older Digidesign ProTools systems Offers 4 inputs and 11 outputs in total Protects from reference signal dropouts Supplies interruption-free output signals AES11, Grade 1, internal reference clock (0.5 ppm) Compact case size fits in every studio set-up Built-in international power supply Applications Stellate Word Clock distribution Sound improvement of digital audio devices Audiophil clock recovery and regeneration Interconnection of consumer and professional digital audio devices Line extension for e.g. theatre or broadcast installations Output expansion for MUTEC's iClock, iClockdp, iD, iDdp, MC-3, MC-3.1 and MC-3.2
