PEAVEY BAM 210C BASS COMBO

350W drives 2 - 10" cast-frame woofers and a horn-loaded tweeter with L-pad. 3-band passive and active EQ with midshift. The modeling section offers up a host of convincing amp and cab simulations. The effects section includes chorus/flange with crossover (variable high-pass filter), octave divider, distortion, auto-wah, and synth with fretless and funk wah settings. The cab features recessed casters, a pull-up handle, and an angled baffle for tilt-back placement without low-end loss.

Features 350W power @ 4 ohms
2 - 10" cast-frame speakers
Horn tweeter with L-pad
Cab and amp modeling
Compressor section
Master volume
Headphone jack
3-band active and passive EQ with midshift
