JACQUES FUSE BLOWER DISTORTION

The FUSE BLOWER's three distortion engines allow any classic vintage distortion tones as well as modern "shredding" solo sounds. Versatility and personality can at least live in peace in a compact pedal. Each BLOW mode is a FUSEBLOWER voiced differently:

- BLOW1 is voiced for low end ,
- BLOW2 for mid-boost and
- BLOW3 for treble bite .

This 3 different distortions can be set independently one from each other, thus allowing any tailored combination. Yes, you will spend more time finding your own signature tone but now with the fb2 will eventually let you perform distortion sculpting as an art form as opposed to factory presets. Be unique.
