| Wincent

Back in 1995, Wincent was the first company to launch a steel-wire brush line, which offered 3 different wire thicknesses. The goal is to manufacture brushes with the best feel, balance and durability. Wincent brushes are handmade in our factory by Swedish craftsmen. The brushes are equipped with a genuine smooth rubber handle that creates a great feel and provides a perfect grip. New for 2010 is also the new color coded triangle pull rod tip of the brushes. This makes it easy to identify your brushes in your stickbag.

Steel Brushes:

- Light brushes;
- With steel wires;
- The brushes are incorporated into sturdy plastic handles and can be protected by pushing them inside;
- The steel brushes produce a wide sound and impress with their fast springback;
- Length: 355 mm;
- Dia: 14 mm;
- Thickness: Light
