

PEARL CHA-70 Arm & Leg Cymbal Adapter

74,00 € tax included

Reference: CHA-70

CHA-70 | CHA70 | CHA 70 | CHA | 70 | arm leg cymbal adapter

Combining an extendable cymbal boom arm with two-way multi-positioning clamp, the CHA70 attaches to existing knurled rods around the kit from 8mm to 12mm. This makes adding cymbals to floor tom legs, L-Arms, and cymbal boom arms totally possible, expanding your set-up without additional stands.

The boom arm's gearless Uni-lock tilter adjusts to practically any angle, and the forward/aft and side-to-side adjustment of the mounting clamp makes difficult positioning around the drum set a breeze. Exceptional for working drummers who want to extend the use of existing gear in tight spaces.
