

AKG DB1 KIT (PONTICELLO AMPLIFICATO + PHANTOM POWER)

149,00 € tax included

Reference: AKDB1KIT

AKG "DB1" PONTICELLO AMPLIFICATO PER CONTRABBASSO CON PHANTOM POWER E ALIMENTATORE

Una vera occasione per chi desidera amplificare il proprio contrabbasso in maniera ottimale, pratica e comoda senza problemi di larsen.

Un pratico kit costituito dal ponticello amplificato AKG "DB1", dalla phantom power ROLLS "PB 23" con alimentatore incluso.

AKG DB1

Piezoelectric transducer for natural, airy sound; standard size for individual adjustment. The DB1 has been designed in consultation with touring and studio musicians for direct double bass miking. The DB1 is a double bass bridge with an integrated pickup that ensures professional audio quality and greater freedom in playing because there is no need to keep the instrument within the pickup angle of an external microphone. The absence of a stand and stand adapter facilitates setting up the equipment on stage. The pickup is a piezoelectric transducer element integrated into a conventional wooden double bass bridge. The frequency response of the DB1 has been optimized for the double bass frequency spectrum.

ROLLS PB 23

- Phantom power for 1 condenser microphone
- 48 V phantom voltage
- In / Out: XLR
- Operation via external switched-mode power supply (included)
