WARWICK BEESWAX - SURFACE FINISHER

WARWICK BEESWAX - SURFACE FINISHER

This entirely natural product has been developed after years of experience in building top-quality basses.

It helps the wood to breath, feeds it and retains it in optimum condition.

To protect the surface of your oil-finished Warwick bass and to preserve its beauty, we recommend that you apply this wax at least once a week.

Apply with a soft cloth and leave for 2-3 minutes before polishing with a clean one.

surface finisher consisting of beeswax
