MONO M80 ELECTRIC GUITAR CASE

MONO M80 ELECTRIC GUITAR CASE

The classic MONO M80 Hybrid Case can be found in the hands of influential musicians from Brooklyn to Seoul to Sao Paulo and everywhere in between. Its patented protective features and light weight hybrid shell revolutionized the way we travel with our guitars, and brought musician luggage into the 21st century. Years of feedback from working artists has driven countless tiny improvements, proving that this original design just gets better with time. If you own a guitar, you should own a MONO.

360° PROTECTION

DROP-PROOF

The patented Headlock™ design provides a level of protection worthy of the finest instruments. Your guitar quickly straps in and remains stabilized during transport. The headstock is suspended inside the case, saving the guitar from both side and rear impacts that could otherwise snap the neck. Extensive testing reveals that “Hardcase protection” is a myth, as the Headlock™- equipped M80 outperforms traditional wood and plastic hard cases in every way.

IMPACT DEFLECTION & STRAP PIN PROTECTION

Integral ABS panels deliver hardcase protection at a fraction of the weight. (MONO cases weigh in at about 75% less than their hardcase counterparts.) The reinforced outer shell of the M80 hybrid case absorbs and deflects hard impact away from the vulnerable areas of the guitar.
Hi-density foam bumpers divert vertical impacts out and around the lower bout of the guitar, away from the strap pin.

SMART STORAGE

TICK-READY

Most MONO cases come equipped with the triple D-ring attachments required for the optional The Tick™ the modular tool case designed to extend the storage capacity of your guitar case. The Tick seamlessly and securely attaches to the case as shown. Some older cases may not be Tick-ready – please contact support if you have questions about the Tick-compatibility of your MONO case.

PLUG AND PLAY

Everything in its place. Specialized storage compartments put your gear right where you need it.

SECRET STASH

The hidden upper pocket keeps your wallet, keys, and cell concealed. Pen slots double as tool storage. Business card storage and a durable key clip is also included.

BUILT TO LAST

WEAR IT OUT

We build our cases to military specs, using only high-test materials with extreme resistance to abrasion and the elements. Inside, the plush lining protects delicate custom finishes. Outside, the water-resistant Sharkskin™ shell keeps you on the move, rain or shine. 100% animal free.

RIVETED HANDLE

Rock solid, industrial webbing handles come standard on MONO cases. Bar-tack stitching and steel rivets reinforce for strength, while high grade webbing provides a super comfortable grip.

HYPALON SOLE

All M80 cases feature a hard-wearing sole and piping made of Hypalon – the same industrial rubber used to create inflatable military rafts. This sole simply does not wear out.

DIMENSIONS & FITTING

LIKE A GLOVE

These measurements represent the inner capacity of the case. If you are unsure about the fit for your guitar, make sure it does not exceed any of the maximum dimensions shown just to be safe. This case is designed to fit standard body electric guitars including Fenders like Teles and Strats, Gibsons like Les Pauls and SGs, ESP and many others.
