Antq for Fender Mandolin

11034-51 Vintage correct, drop-in replacement for Fenders early soldibody mandolins. Seymour started making this pickup back in the early 80s when there was a big surge in Mandolin popularity. This single coil mandolin pickup is recreated to fit into early solid body mandolins. The coil is wound top going and north polarity like the original. The replacement mandolin pickup comes with mounting screws, schematic, and is wax-potted. The hookup wire is the classic push back cloth braid wire.
