Antq P90 Dog Ear Neck Blk

11034-65 Capture the weathered midrange growl and grit of an original '59 ES-330 with our Antiquity P-90 Dog Ear pickups. Our Antiquity P90 Dog Ear pickups use two specially calibrated alnico 2 bar magnets, and custom neck and bridge coil winds to deliver the sweet, vintage correct growl of late 50s ES-330 P90 pickups. In the neck position, chords are full and round sounding, and single notes have a sweet, bouncy quality. In the bridge, chords have a gritty, honky midrange, and single notes are nice and articulate without sounding harsh. The neck pickup is also wound RW/RP to be hum-cancelling when paired with the bridge position model. If you remove our hand aged dog ear cover, you'll find the same hand fabricated bobbin, plain enamel mag wire, and flatback tape that was made in Kalamazoo during the early days. These pickups are drop-in replacements for any standard Gibson P90 Dog Ear sized route, and come with aged black covers.
