Antq '50s Brdg Saddles For Tele

11089-01 Our vintage reproductions of the old 5253 Telecaster bridge saddles. Hand machined from the best brass alloy, the Antiquity 50s Brass Bridge Saddles are made to bring out great sustain and the fullness of each note. These saddles are aged like they've been played for many decades. The intonation screw is a fillister head, and the height adjustment screws are headless, slotted machine screws. The bottoms of the bridge saddles are trimmed to give added height adjustment (up or down). The three bridge units fit standard bridge specifications. Length: .850 Width .310 Height .265 Total screw height .492 Height adjustment 632 X .492 , headless, slotted Intonation: 632 X 1.25 , fillister head, slotted
