SM2b Custom MiniHumbkr

11102-34 The Custom Mini Humbucker pickup delivers that classic Firebird tone—a blend of single-coil-style high end and more focused humbucker low end in the bridge and a rich midrange in the neck. It adds up to a cool, snarly grittiness, and enough bite to cut through any mix. The Custom Mini Humbucker is a modern take on the classic Firebird sound. Its ceramic magnet and overwound coils give it enough bite to cut through any mix. The bridge model has tremendous punch and a top-end zing almost like a single-coil, but with a tight, humbucker-style low end. Great for big, detailed chords, or a solo tone with a nice, edgy bite. It’s a great match for the Custom Mini Humbucker neck model, or pair it with a Seymourized Mini Humbucker neck pickup for a more traditional neck tone. The Custom Mini Humbucker neck pickup provides that creamy, singing tone with none of the excessive low end that can affect some neck humbuckers. Hand made in Santa Barbara, CA, this pickup is a drop-in replacement for any mini-humbucker sized rout and is intended to be mounted to the guitar using a Firebird-style mounting ring and 3-48 humbucker mounting screw. Comes with a 4-conductor lead wire for multiple wiring options, and is vacuum wax potted for squeal-free operation.
