PATB3b Blues Saraceno Model

11102-78 A medium output passive humbucker pickup, the dual-pole Parallel Axis Trembucker delivers a truly versatile tone specifically voiced by Blues Saraceno. Originally created in our Custom Shop for Blues Saraceno, this pickup was voiced to have the tonal character of a P.A.F., but with the power to cut through for Blues' dynamic playing style. As Blues put it, this pickup provides a "'notched' tone with a 'honky,' old-school, retro vibe." Great for all styles of rock and blues, the Parallel Axis Blues Saraceno model behaves very nicely under any amount of gain. Like all Trembuckers, the Parallel Axis Blues Saraceno Trembucker features a wider pole piece spacing, perfect for symmetrical positioning under the strings of guitars with a tremolo or wide-spaced hard tail bridge (2" or wider from the center of the Low E to High E directly over the bridge pickup). Hand made in Santa Barbara, CA, the Parallel Axis Blues Saraceno medium output humbucker pickup uses our unique dual-pole design for added sustain, an alnico 5 bar magnet, 4-conductor wire for multiple wiring options, and is vacuum wax potted for squeal free operation.
