TB5 Duncan Custom Trembkr Blk

11103-17-B A custom overwound P.A.F.-like humbucker with moderate output, perfectly voiced for supreme blues, rock, and metal. The Duncan Custom is a medium output humbucker pickup that features a small ceramic magnet and custom-wound coils to dish out a ‘P.A.F.-on-steroids’ tone. It has tight lows, a bump in the upper midrange that gives you more character and crunch, and an airy high end that cuts through heavy distortion but is also great for achieving crystal-clear clean tones. It’s especially suited for warmer-sounding guitars with a prominent midrange. Therefore, many players like to use it in Les Pauls and Paul Reed Smiths. It pairs well with the Jazz or ’59 neck models, and forms one half of our ’59/Custom Hybrid humbucker.Hand built in our Santa Barbara, CA factory, the Duncan Custom medium output humbucker pickup features a small ceramic bar magnet, nickel silver bottom plate, 4-conductor lead wire for multiple wiring options, and is vacuum wax potted for squeal-free performance. Available in standard humbucker or Trembucker spacing for 6-string, or in a passive mount 7-string configuration.
